

## Pipeline, Plant Turnaround and MRO Nitrogen Services

Safe, accurate, efficient and on budget

### Our services for Pipeline and Plant Turnaround include:

- Purging
- Pipeline Drying (nitrogen can achieve -100° F dew point for projects where moisture removal is critical)
- Blanketing
- Pigging & Pipeline Cleaning
- Pressure Testing Services
- Leak Testing
- Plant Commissioning
- Accelerated Cool-Downs
- Reactor Hot Stripping
- Accelerated Drying
- Portable Storage Equipment

**One call does it all!**

From the moment you contact us, Messer will tailor our approach to meet your project’s unique operational and environmental requirements. Whether a pipeline purge or a major plant turnaround, we will ensure that we get the job completed safely, accurately, within budget, and on time.

For every job, our onsite team brings a wealth of pressure pumping experience with the greatest focus on safe

project execution. Messer will coordinate and oversee all the work, including:

- Delivery of all equipment, material and subcontracts
- Site and job safety assessments
- Delivery, storage and pumping of nitrogen
- Pneumatic testing, including water removal and line drying
- Coordination with other service companies and your designated team
